

Professional Ultrasonic Cleaning for the Automotive Industry

ASNU are the world leaders in Ultrasonic Cleaning of Gasoline Fuel Injectors, with over 15 years of experience in this field. Ultrasonic's are used for cleaning in many applications in a multitude of industries, Dentists, Doctors and Hospitals use Ultrasonic's to get metal clinically clean. Now ASNU have introduced a range of cleaning tanks specifically designed for the Automotive Aftermarket Industry. Bring your workshop up-to-date with an ASNU Ultrasonic Cleaning Tank.

Before & After Examples

Features & Benefits

- # Save time - place the parts in the tank and leave them to clean.
- # Save money - no time wasted standing over a parts washer.
- # Cost effective - no monthly contracts for fluid changing.
- # Bio Degradable fluid - no disposal problems or costs.
- # Power Adjustable - Safe for use with Aluminium products.
- # Safe and Hygienic - no breathing or derma logical issues.
- # User Friendly - basket to hold parts, lid to cover tank.
- # Stainless Steel construction - Long life, easy to clean.
- # Separate Power Generator - easier and safer operation.
- # Internal Sludge Trap - maintain ultrasonic effectiveness.
- # Tanks made to your requirements, ask for a quote.

Important Information

When comparing ASNU with other tanks, please remember that the size and number of transducers used is important to the effectiveness and efficiency of the cleaning process. Damage to aluminium products may occur if aggressive ultrasonic with excessive power is used. Aggressive chemicals may also damage some automotive parts. ASNU tanks and Cleaning Fluid have been produced specifically for the Automotive Aftermarket Industry, by using the correct size and number of transducers in each tank. Our Cleaning Fluid is a non-corrosive water based Bio-Degradable chemical that will not damage Automotive applications, ASNU have been successfully using this chemical for Ultrasonically Cleaning Gasoline Injectors for the past 15 years.

Technical Specifications

PART NUMBER	TRANSDUCERS USED	INTERNAL SIZE	TANK CAPACITY
ASNU W100	1	150 x135 x100	1.5 Lts
ASNU W200	2	240 x135 x100	2.5 Lts
ASNU W300	6	350 x200 x250	15.0 Lts
ASNU W600	12	450 x300 x270	30.0 Lts
ASNU W1200	24	700 x400 x350	60.0 Lts
ASNU CF10	CLEANING FLUID	10.0 Lt	N/A
ASNU CF25	CLEANING FLUID	25.0 Lt	N/A
