

ASNU Updated Pintle Cap Remover & Fitting Tool

Part No: ASNU 84

We are pleased to announce we have updated our original ASNU 84 tool. The ASNU 84 was a pintle cap assembly tool, but now we have added components to this tool, so it can be used to remove pintle caps as well. All new ASNU Classic GDI machines will now come with this updated ASNU 84 tool.

If you already have a standard ASNU 84 tool, you can purchase the additional parts from us to make it capable of removing pintle caps from Top Feed and Side Feed injectors.

Upgrade Kit for existing ASNU 84 Tool

Part No: ASNU 84B
