QUALITY PROCESS

ASNU Corporation Europe Limited has throughout its history strived to continually improve for the benefit of both customers and employees.

In setting itself high standards, the aims deliver the level of quality and service that we hope exceed the customers' expectations.

ASNU manages quality awareness through a continual process of observation of the Automotive market trends and developments. Quality objectives are defined by market measurement, staff training, and employee development.

Product quality control follows an established and audited procedure with regular assessment of suppliers, products and production techniques. This enables us to achieve continual internal improvement and external Supplier Development.

The company actively pursues new business opportunities in the Automotive Industry to ensure continued growth for both our company and our distributors and afford us an insight to market changes and developments that may be relevant to our market.

ASNU's management constantly reviews all corrective and preventative action. These actions deliver continual improvement and better process throughout the company and its employees.
